1995 Annual Index for Simulation

Issues from Volume 64, Number 1 through Volume 65, Number 6

The following 1995 Annual Index contains two parts: A title and keyword listing, and an author listing. All pertinent information concerning an article will be found in the author listing under the name of the first author. Co-authors, title, month of issue, pages and the number of references, figures and tables are shown.

The title and keyword listing shows the title, name of the first author, the page number on which the article begins, and month of publication. Also listed are keywords followed by title entries for the article in question. The average article is listed five times. Keywords are marked by an asterisk, followed by the title entry; a slash "/" indicates that a title has been truncated.

All material published in the journal has been indexed except letters to the editor, calls for papers, and notices and programs of meetings. Advertisers are not indexed.

3-D Stack Analog 3-D Neuroprocessor for Fast Frame Focal Plane Image Processing	Daud, T.	July	11-25
3-D scene editor Virtual Mechanics Simulation and Animation of Rigid Body/	Keller, H.	July	74-78
802.6/DQDB Simulation Comparison of Broadband Networking Technologies	Petr, D.W.	Jan.	42-50
A Block-Based Simulation Tool for the Enhancement of TCP/UDP Protocols	Chen, J.	Jan.	61-63
A Comparison of Evolutionary Programming and Genetic Algorithms on Selected/	Fogel, D.B.	June	397-404
A Multicomputer Software Interface for Parallel Dynamic System Simulation	Wells, E.B.	Sept.	191-205
A New Graduate Course: Using Simulation Models for Engineering Design	Barton, R. R.	March	145-153
A PDP Approach to Localized Fractal Dimension Computation with Segmentation/	Rogers, G.W.	July	26-36
A Performance Simulation Study of the Ethernet and Token Bus Local Computer Networks	Obaidat, M.S.	June	381-397
A Simulation Model of Drum-Buffer-Rope for Production Planning and Control at a/	Guide, V.D. Jr.	Sept.	157-168
A Simulation Model for Defining Three Solar Accesses in Site Planning	Obaidat, B.Q.	Dec.	357-371
A Simulation Modeling Methodology for Analyzing Large Complex Rail Networks	Dessouky, M.M.	Aug.	131-142
A Survey of TES Modeling Applications	Melamed, B.	June	353-370
auto correlated processes*Survey of TES Modeling Applications	Melamed, B.	June	353-370
A Toolkit for Monitoring the Utilization and Performance of Computer Networks	Hamilton, J.A.	May	297-301
AACC Biographies of the American Automatic Control Council Awardees 1995		Sept.	207-208
ACSL Universal Database for Dynamic Simulation	Chen, F.F.K.	Nov.	293-303
AI & Simulation	Wildberger, A.M.	Aug.	92-93
AI & Simulation	Wildberger, A.M.	May	288
AI & Simulation	Wildberger, A.M.	Nov.	292
AI & Simulation	Wildberger, A.M.	Sept.	156
AI & Simulation	Wildberger, A.M.	April	212
AI & Simulation	Wildberger, A.M.	Feb.	76
AI & Simulation	Wildberger, A.M.	June	352
air pollution*Maintaining Control of a Feebate System	Ford, A.	April	228-242
ALOPEX*Comparison of Neural Network Algorithms for Face Recognition	Micheli-Tzanakou, E.	July	15-27
An heuristic Technique for Selecting the Run-Length of non-Terminating/	Robinson, S.	Sept.	170-179
Analog 3-D Neuroprocessor for Fast Frame Focal Plane Image Processing	Daud, T.	July	11-25
analog*VLSI Analog 3-D Neuroprocessor for Fast Frame Focal Plane Image Processing	Daud, T	July	11-25
Analyzing Simulation Output Using Bootstrap Method	Friedman, L.	Feb.	95-100
statistical analysis*Analyzing Simulation Output Using Bootstrap Method	Friedman, L.	Feb.	95-100
Architecture and Performance of MLAN: A Multimedia Local ATM Network		Jan.	15-27
ASPIN*Generating Simulation Models from natural Language Specifications	Cyre, W.R.	Oct.	239-251
Assessing Correlation Structures with Subjective Information - An Interactive Approach	Kumar, D.	May	333-340
asynchronous sequential circuit*Implementation of a Test Generation Algorithm/	Vishnubhotla, S.R.	Oct.	225-238
ATM LAN*Architecture and Performance of MLAN: A Multimedia Local ATM Network		Jan.	15-27
atmospheric circulation*Basic Physics and Numerical Modeling of Climate	Bradley, J.H.	April	259-175
ATM*Simulation Comparison of Broadband Networking Technologies	Petr, D.W.	Jan.	42-50
ATM*Simulation Technique For Evaluating Cell-Loss Rate in ATM Networks	Ani, C.I.	May	320-330
back propagation*Comparison of Neural Network Algorithms for Face Recognition	Micheli-Tzanakou, E.	July	15-27
back propagation*Neural Network Control of a Free-Flying Space Robot	Wilson, E.	Aug.	103-115
back-propagation*Analog 3-D Neuroprocessor for Fast Frame Focal Plane/	Daud, T.	July	11-25
Basic Physics and Numerical Modeling of Climate	Bradley, J.H.	April	259-175
atmospheric*Basic Physics and Numerical Modeling of Climate	Bradley, J.H.	April	259-175
blackboard Performance Evaluation of a Blackboard Using Stochastic Petri Nets	Almhana, J.	Oct.	269-278
block-based simulation tool* Block-based Simulation Tool for the Enhancement/	Chen, J.	Jan.	61-63
Bond Graphs: the Right Choice for Educating Students in Modeling Continuous-Time /	Cellier, F.E.	March	154-159
bond graphs*Bond Graphs: the Right Choice for Educating Students in Modeling/	Cellier, F.E.	March	154-159
bootstrap*Analyzing Simulation Output Using Bootstrap Method	Friedman, L.	Feb.	95-100
broadband network performance*Simulation Comparison of Broadband/	Petr, D.W.	Jan.	42-50
buffering allocation*Simulation of an Optical Architecture for High Speed/	Guizani, M.	Jan.	27-33

1995 Annual Index for Simulation

Issues from Volume 64, Number 1 through Volume 65, Number 6

The following 1995 Annual Index contains two parts: A title and keyword listing, and an author listing. All pertinent information concerning an article will be found in the author listing under the name of the first author. Co-authors, title, month of issue, pages and the number of references, figures and tables are shown.

The title and keyword listing shows the title, name of the first author, the page number on which the article begins, and month of publication. Also listed are keywords followed by title entries for the article in question. The average article is listed five times. Keywords are marked by an asterisk, followed by the title entry; a slash "/" indicates that a title has been truncated.

All material published in the journal has been indexed except letters to the editor, calls for papers, and notices and programs of meetings. Advertisers are not indexed.

3-D Stack Analog 3-D Neuroprocessor for Fast Frame Focal Plane Image Processing	Daud, T.	July	11-25
3-D scene editor Virtual Mechanics Simulation and Animation of Rigid Body/	Keller, H.	July	74-78

atmospheric*Basic Physics and Numerical Modeling of Climate	Bradley, J.H.	April	259-175
blackboard Performance Evaluation of a Blackboard Using Stochastic Petri Nets	Almhana, J.	Oct.	269-278
block-based simulation tool* Block-based Simulation Tool for the Enhancement/	Chen, J.	Jan.	61-63
Bond Graphs: the Right Choice for Educating Students in Modeling Continuous-Time /	Cellier, F.E.	March	154-159
bond graphs*Bond Graphs: the Right Choice for Educating Students in Modeling/	Cellier, F.E.	March	154-159
bootstrap*Analyzing Simulation Output Using Bootstrap Method	Friedman, L.	Feb.	95-100
broadband network performance*Simulation Comparison of Broadband/	Petr, D.W.	Jan.	42-50
buffering allocation*Simulation of an Optical Architecture for High Speed/	Guizani, M.	Jan.	27-33

California*Maintaining Control of a Feebate System	Ford, A.	April	228-242
cascade*Analog 3-D Neuroprocessor for Fast Frame Focal Plane Image Processing	Daud, T.	July	11-25
case studies*A New Graduate Course: Using Simulation Models for Engineering Design	Barton, R.R	March	145-153
cell loss rate*Simulation Technique For Evaluating Cell-Loss Rate in ATM Networks	Ani, C.I.	May	320-330
CERES-GKN: Coalition for Environmentally Responsible Economies- A Global /	Lehmann, A.	April	254-258
Chaos in a Real System	Tylee, J.L.	March	176-183
chaos*Chaos in a Real System	Tylee, J.L.	March	176-183
climate*Basic Physics and Numerical Modeling of Climate	Bradley, J.H.	April	259-175
Comparison of Neural Network Algorithms for Face Recognition	Micheli-Tzanakou, E.	July	15-27
complexity*Parallel Switch-Level Fault Simulation Performance Modeling Using VHDL	Ryan, C.	May	308-319
computational intelligence*Simulation and Computational Intelligence in /	Padgett, M.	July	5-9
computer animation*Virtual Mechanics Simulation and Animation of Rigid Body Systems/	Keller, H.	July	74-78
computer simulator modeling *Taxonomy of Aircraft Ground Modal Behavior:/	Kapadoukas, G.G.	Oct.	257-266
concurrent coordination*Organizational Aspects of Concurrent Design	Jin, Y.	March	42-57
Constrained Simulation of a Mine Production System	Frimpong, S.	Nov.	305-312
constrained optimization*A Comparison of Evolutionary Programming and Genetic/	Fogel, D.B.	June	397-404
control*Neural Network Control of a Free-Flying Space Robot	Wilson, E.	Aug.	103-115
convergence*An heuristic Technique for Selecting the Run-Length of non-Terminating/	Robinson, S.	Sept.	170-179
correlation matrix*Assessing Correlation Structures with Subjective Information/	Kumar, D.	May	333-340
DAP*Universal Database for Dynamic Simulation	Chen, F.F.K.	Nov.	293-303
data collection tools*A Toolkit for Monitoring the Utilization and performance /	Hamilton, J.A.	May	297-301
data compression*Comparison of Neural Network Algorithms for Face Recognition	Micheli-Tzanakou, E.	July	15-27
data structures*Implementation of a Test Generation Algorithm for Hardware /	Vishnubhotla, S.R.	Oct.	225-238
decision making*Information Fusion by Fuzzy Set Operation and Genetic Algorithms	Loskiewicz-Buczak, A.	July	52-66
deductive machine*Simulation and Verification of Protocol Using Deductive Machine	Lai, R.	Nov.	321-334
deductive systems*Simulation and Verification of Protocol Using Deductive Machine	Lai, R.	Nov.	321-334
delay-throughput relationship* Performance Simulation Study of the Ethernet/	Obaidat, M.S.	June	381-397
delay/jitter*Simulation Technique For Evaluating Cell-Loss Rate in ATM Networks	Ani, C.I.	May	320-330
Design and Performance Evaluation of Picture Archival and Communication Systems	Kolyuncu, H.	Feb.	77-89
digital circuits*Electrical Characterization of High-Speed Interconnects with a Parallel/	Bataineh, A.	May	289-25
discrete event simulation*Using Simulation for Robust System Design	Benjamin, P.C.	Aug.	116-128
Discrete-event simulation* Performance Simulation Study of the Ethernet and /	Obaidat, M.S.	June	381-397
discrete-event simulation*Modeling and Simulation of a High Speed LAN	Ayani, R.	Jan.	7-14
discrete-valued function*Neural Network Control of a Free-Flying Space Robot	Wilson, E.	Aug.	103-115
dispatching* Simulation Modeling Methodology for Analyzing Large Complex /	Dessouky, M.M.	Aug.	131-142
distinguishable faults*Implementation of a Test Generation Algorithm for Hardware/	Vishnubhotla, S.R.	Oct.	225-238
distributed parameters*Universal Database for Dynamic Simulation	Chen, F.F.K.	Nov.	293-303
distributed shared memory*Performance Evaluation of a Blackboard Using Stochastic/	Almhana, J.	Oct.	269-278
Dynamic Simulation Modeling on a Spreadsheet	Stent, A.F.	June	373-379
dynamic simulation*Dynamic Simulation Modeling on a Spreadsheet	Stent, A.F.	June	373-379
dynamic system simulation*A Multicomputer Software Interface for Parallel Dynamic/	Wells, E.B.	Sept.	191-205
Editorial	Linn, H.	Sept.	155
Editorial: About Mission Earth and Ben	Mcleod, J.	April	213
education*A New Graduate Course: Using Simulation Models for/	Barton, R.R.	March	145-153
education*Bond Graphs: the Right Choice for Educating Students in Modeling/	Cellier, F.E.	March	154-159
education*Chaos in a Real System	Tylee, J.L.	March	176-183
eigen values*Taxonomy of Aircraft Ground Modal Behavior: A Brief Report	Kapadoukas, G.G.	Oct.	257-266
electric utility systems*The Geni Model: The Interconnection of Global Power/	Meisen, P.	April	244-252
electric combat vehicles*Power Simulation for All Electric Combat Vehicles	Fish, S.	Dec.	393-397
electric vehicles*Maintaining Control of a Feebate System	Ford, A.	April	228-242
Electrical Characterization of High-Speed Interconnects with a Parallel Three-Dimensional/	Bataineh, A.	May	289-25
end user decision*Spreadsheet Analysis of Linear Programs with Uncertainty	Leon, L.	Feb.	113-130
energy*Power Simulation for All Electric Combat Vehicles	Fish, S.	Dec.	393-397
energy conserving design*A Simulation Model for Defining Three Solar Accesses/	Obaidat, B.Q.	Dec.	357-371
energy planning*A Simulation Model for Defining Three Solar Accesses/	Obaidat, B.Q.	Dec.	357-371
engineering coordination*Organizational Aspects of Concurrent Design	Jin, Y.	March	42-57
engineering design*A New Graduate Course: Using Simulation Models for/	Barton, R.R.	March	145-153
error analysis*Inverse Simulation - An Error Analysis	Lin, K.C.	Dec.	385-392
estimates*Simulation of Future Natural Gas Production and Exploration	Connor, S.L.	April	213-225
Ethernet*A Performance Simulation Study of the Ethernet and Token Bus Local /	Obaidat, M.S.	June	381-397
evolutionary programming* Comparison of Evolutionary Programming and/	Fogel, D.B.	June	397-404
evolutionary systems*Simulation and Computational Intelligence in Real-World/	Padgett, M.	July	5-9
Evolving a Rule-Based Fuzzy Controller	Cooper, M.G.	July	67-73
F-CORE*Comparison of Neural Network Algorithms for Face Recognition	Micheli-Tzanakou, E.	July	15-27
face recognition*Comparison of Neural Network Algorithms for Face Recognition	Micheli-Tzanakou, E.	July	15-27
Fast Simulation of Open Queueing Systems	Hunt, C.S.	Sept.	183-190

fast simulation*Fast Simulation of Open Queueing Systems	Hunt, C.S.	Sept.	183-190
fault dictionary*Implementation of a Test Generation Algorithm for Hardware/	Vishnubhotla, S.R.	Oct.	225-238
fault tolerance*Parallel Independent Replicated Simulation on a Network of Workstations	Lin, Y-B	Feb.	102-110
force model*Dynamic Simulation Modeling on a Spreadsheet	Stent, A.F.	June	373-379
Fourier spectrum*Using Walsh Functions to Test a New Composite Sherif-Dear (CSD)/	Sherif, Y.S.,	Nov.	338-342
fractal dimension covering method* PDP Approach to Localized Fractal Dimension /	Rogers, G.W.	July	26-36
frame relay*Simulation Comparison of Broadband Networking Technologies	Petr, D.W.	Jan.	42-50
fuzzy logic*Evolving a Rule-Based Fuzzy Controller	Cooper, M.G.	July	67-73
fuzzy systems*Simulation and Computational Intelligence in Real-World Applications	Padgett, M.	July	5-9
Generating Antithetic Random Variates in Simulation of a Replacement Process/	Mahlooji, H.	Aug.	94-100
Generating Simulation Models from Natural Language Specifications	Cyre, W.R.	Oct.	239-251
genetic algorithms*A Comparison of Evolutionary Programming and Genetic/	Fogel, D.B.	June	397-404
genetic algorithms*Information Fusion by Fuzzy Set Operation and Genetic Algorithms	Loskiewicz-Buczak, A.	July	52-66
genetic algorithms*Evolving a Rule-Based Fuzzy Controller	Cooper, M.G.	July	67-73
Getting Connected	Ingalls, W.	April	214, 227
Greenhouse effective* Geni Model: The Interconnection of Global Power/	Meisen, P.	April	244-252
Guest Editorial	Vakilzadian, H.	March	144
Guest Editorial: High Speed Networking: Performance Simulation Modeling/	Obaidat, M.S.	Jan.	4-6
heuristic* heuristic Technique for Selecting the Run-Length of non-Terminating /	Robinson, S.	Sept.	170-179
Implementation of a Test Generation Algorithm for Hardware Fault Diagnosis	Vishnubhotla, S.R.	Oct.	225-238
independent replicated simulation*Parallel Independent Replicated Simulation/	Lin, Y-B	Feb.	102-110
Industry News	O'Neill, Brian	May	330-331
inference rule*Simulation and Verification of Protocol Using Deductive Machine	Lai, R.	Nov.	321-334
Information Fusion by Fuzzy Set Operation and Genetic Algorithms	Loskiewicz-Buczak, A.	July	52-66
input analysis* Survey of TES Modeling Applications	Melamed, B.	June	353-370
interconnect* The Geni Model: The Interconnection of Global Power Resources to Obtain/	Meisen, P.	April	244-252
interprocess communication*Performance Evaluation of a Blackboard Using/	Almhana, J.	Oct.	269-278
Inverse Simulation - An Error Analysis	Lin, K.C.	Dec.	385-392
inverse simulation*Inverse Simulation - An Error Analysis	Lin, K.C.	Dec.	385-392
K-local calculus*Simulation and Verification of Protocol Using Deductive Machine	Lai, R.	Nov.	321-334
knowledge representation*Generating Simulation Models from natural/	Cyre, W.R.	Oct.	239-251
Kullback-Leibler*A PDP Approach to Localized Fractal Dimension Computation/	Rogers, G.W.	July	26-36
LAN Architecture and Performance of MLAN: A Multimedia Local ATM Network	Agrawal, J.P.	Jan.	15-27
LAN Modeling and Simulation of a High Speed LAN	Ayani, R.	Jan.	7-14
Linda*Performance Evaluation of a Blackboard Using Stochastic Petri Nets	Almhana, J.	Oct.	269-278
linear programming*Spreadsheet Analysis of Linear Programs with Uncertainty	Leon, L.	Feb.	113-130
load balancing*Parallel Independent Replicated Simulation on a Network of Workstations	Lin, Y-B	Feb.	102-110
long term commitment*Simulation of Future Natural Gas Production and Exploration	Connor, S.L.	April	213-225
Lorenz Water wheelchair*Chaos in a Real System	Tylee, J.L.	March	176-183
lumped models*Universal Database for Dynamic Simulation	Chen, F.F.K.	Nov.	293-303
Maintaining Control of a Feebate System	Ford, A.	April	228-242
manufacturing*A Simulation Model of Drum-Buffer-Rope for Production Planning/	Guide,V.D.R.,Jr.	Sept.	157-168
marine simulation*Dynamic Simulation Modeling on a Spreadsheet	Stent, A.F.	June	373-379
Matlab*Power Simulation for All Electric Combat Vehicles	Fish, S.	Dec.	393-397
mechanics simulation*Virtual Mechanics Simulation and Animation of Rigid Body/	Keller, H.	July	74-78
Methodology and Results of Synchronous Digital Hierarchy Network Payload/	Owen, H.L.	Jan.	34-41
mine design*Constrained Simulation of a Mine Production System	Frimpong, S.	Nov.	305-312
modal behavior*Taxonomy of Aircraft Ground Modal Behavior: A Brief Report	Kapadoukas, G.G.	Oct.	257-266
model portability*Universal Database for Dynamic Simulation	Chen, F.F.K.	Nov.	293-303
model validation*Bond Graphs: the Right Choice for Educating Students in Modeling/	Cellier, F.E.	March	154-159
Modeling and Simulation of a High Speed LAN	Ayani, R.	Jan.	7-14
moments*Comparison of Neural Network Algorithms for Face Recognition	Micheli-Tzanakou, E.	July	15-27
Monte Carlo simulation*Assessing Correlation Structures with Subjective Information/	Kumar, D.	May	333-340
multicomputers*A Multicomputer Software Interface for Parallel Dynamic/	Wells, E.B.	Sept.	191-205
multimedia network*Protocol Conversion in Multimedia Networks: Simulation/	Jeng, J-W	Jan.	51-60
multimedia*A Block-based Simulation Tool for the Enhancement of TCP/UDP Protocols	Chen, J.	Jan.	61-63
multimedia*Architecture and Performance of MLAN: A Multimedia Local ATM/	Agrawal, J.P.	Jan.	15-27
multisensor fusion*Information Fusion by Fuzzy Set Operation and Genetic Algorithms	Loskiewicz-Buczak, A.	July	52-66
natural gas*Simulation of Future Natural Gas Production and Exploration	Connor, S.L.	April	213-225
natural language*Generating Simulation Models from Natural Language Specifications	Cyre, W.R.	Oct.	239-251
Netman*A Toolkit for Monitoring the Utilization and Performance of Computer Networks	Hamilton, J.A.	May	297-301
network jitter*Methodology and Results of Synchronous Digital Hierarchy/	Owen, H.L.	Jan.	34-41
network modeling*A Toolkit for Monitoring the Utilization and performance/	Hamilton, J.A.	May	297-301
network monitoring tools*A Toolkit for Monitoring the Utilization and performance/	Hamilton, J.A.	May	297-301
network resource allocation*Simulation Technique For Evaluating Cell-Loss Rate/	Ani, C.I.	May	320-330
network simulation* A Toolkit for Monitoring the Utilization and performance of/	Hamilton, J.A.	May	297-301

network synchronization Methodology and Results of Synchronous Digital /	Owen, H.L.	Jan.	34-41
Neural Network Control of a Free-Flying Space Robot	Wilson, E.	Aug.	103-115
neural networks*Neural Network Control of a Free-Flying Space Robot	Wilson, E.	Aug.	103-115
neural networks*Information Fusion by Fuzzy Set Operation and Genetic Algorithms	Loskiewicz-Buczak, A.	July	52-66
neuroprocessor*Analog 3-D Neuroprocessor for Fast Frame Focal Plane Image Processing	Daud, T.	July	11-25
News From the Nominating Committee	Chou, Q.B.	Sept.	180-181
non-terminating*An heuristic Technique for Selecting the Run-Length of non-Terminating/	Robinson, S.	Sept.	170-179
nonlinear optical devices*Simulation of an Optical Architecture for High Speed Multistage/	Guizani, M.	Jan.	27-33
nonparametric*Analyzing Simulation Output Using Bootstrap Method	Friedman, L.	Feb.	95-100
numerical procedure*Inverse Simulation - An Error Analysis	Lin, K.C.	Dec.	385-392
object-oriented modeling*Fast Simulation of Open Queueing Systems	Hunt, C.S.	Sept.	183-190
optical multistage interconnection networks*Simulation of an Optical/	Guizani, M.	Jan.	27-33
ore transportation system*Constrained Simulation of a Mine Production System	Frimpong, S.	Nov.	305-312
organizational design*Organizational Aspects of Concurrent Design	Jin, Y.	March	42-57
PACS*Design and Performance Evaluation of Picture Archival and Communication/	Kolyuncu, H.	Feb.	77-89
Parallel Independent Replicated Simulation on a Network of Workstations	Lin, Y-B	Feb.	102-110
Parallel Switch-Level Fault Simulation Performance Modeling Using VHDL	Ryan, C.	May	308-319
parallel computer architecture*Electrical Characterization of High-Speed/	Bataineh, A.	May	289-25
parallel distributed processing*A PDP Approach to Localized Fractal Dimension/	Rogers, G.W.	July	26-36
parallel fault simulation*Parallel Switch-Level Fault Simulation Performance/	Ryan, C.	May	308-319
parallel processing*Electrical Characterization of High-Speed Interconnects with a Parallel/	Bataineh, A.	May	289-25
parallel processing*A Multicomputer Software Interface for Parallel Dynamic/	Wells, E.B.	Sept.	191-205
parallel processing*Parallel Independent Replicated Simulation on a Network/	Lin, Y-B	Feb.	102-110
parallel simulation*Modeling and Simulation of a High Speed LAN	Ayani, R.	Jan.	7-14
path sensitization*Implementation of a Test Generation Algorithm for Hardware/	Vishnubhotla, S.R.	Oct.	225-238
Performance Evaluation of a Blackboard Using Stochastic Petri Nets	Almhana, J.	Oct.	269-278
performance evaluation*A Performance Simulation Study of the Ethernet/	Obaidat, M.S.	June	381-397
performance evaluation*Design and Performance Evaluation of Picture Archival/	Kolyuncu, H.	Feb.	77-89
performance modeling*Parallel Switch-Level Fault Simulation Performance Modeling/	Ryan, C.	May	308-319
physical system modeling*Bond Graphs: the Right Choice for Educating/	Cellier, F.E.	March	154-159
physics*Basic Physics and Numerical Modeling of Climate	Bradley, J.H.	April	259-175
plant models*Universal Database for Dynamic Simulation	Chen, F.F.K.	Nov.	293-303
pointer processor*Methodology and Results of Synchronous Digital/	Owen, H.L.	Jan.	34-41
Power Simulation for All Electric Combat Vehicles	Fish, S.	Dec.	393-397
power systems*Power Simulation for All Electric Combat Vehicles	Fish, S.	Dec.	393-397
preset function*Implementation of a Test Generation Algorithm for Hardware/	Vishnubhotla, S.R.	Oct.	225-238
President's Message	Sisle, M.	Nov.	316-317
process control*Evolving a Rule-Based Fuzzy Controller	Cooper, M.G.	July	67-73
process-oriented simulation*A Simulation Modeling Methodology for Analyzing Large/	Dessouky, M.M.	Aug.	131-142
production and economic analysis*Constrained Simulation of a Mine Production System	Frimpong, S.	Nov.	305-312
production planning and control*A Simulation Model of Drum-Buffer-Rope/	Guide,V.D.R., Jr.	Sept.	157-168
Protocol Conversion in Multimedia Networks: Simulation and Algorithm	Jeng, J-W	Jan.	51-60
protocol*Architecture and Performance of MLAN: A Multimedia Local ATM Network	Agrawal, J.P.	Jan.	15-27
protocol conversion*Protocol Conversion in Multimedia Networks: Simulation/	Jeng, J-W	Jan.	51-60
protocol modeling*Simulation and Verification of Protocol Using Deductive Machine	Lai, R.	Nov.	321-334
queueing systems*Fast Simulation of Open Queueing Systems	Hunt, C.S.	Sept.	183-190
queuing models*A Simulation Modeling Methodology for Analyzing Large/	Dessouky, M.M.	Aug.	131-142
radiology department*Design and Performance Evaluation of Picture Archival /	Kolyuncu, H.	Feb.	77-89
rail networks*A Simulation Modeling Methodology for Analyzing Large Complex/	Dessouky, M.M.	Aug.	131-142
random number generator*Using Walsh Functions to Test a New Composite/	Sherif, Y.S.	Nov.	338-342
redundant wires*Implementation of a Test Generation Algorithm for Hardware/	Vishnubhotla, S.R.	Oct.	225-238
rejection method*Generating Antithetic Random Variates in Simulation of a /	Mahlooji, H.	Aug.	94-100
remanufacturing*A Simulation Model of Drum-Buffer-Rope for Production Planning/	Guide,V.D.R.,Jr.	Sept.	157-168
resampling*Analyzing Simulation Output Using Bootstrap Method	Friedman, L.	Feb.	95-100
resources*Simulation of Future Natural Gas Production and Exploration	Connor, S.L.	April	213-225
response surface methodology*Using Simulation for Robust System Design	Benjamin, P.C.	Aug.	116-128
rigid body systems*Virtual Mechanics Simulation and Animation of Rigid/	Keller, H.	July	74-78
risk analysis*Simulation of Future Natural Gas Production and Exploration	Connor, S.L.	April	213-225
robotics*Neural Network Control of a Free-Flying Space Robot	Wilson, E.	Aug.	103-115
Robust system design*Using Simulation for Robust System Design	Benjamin, P.C.	Aug.	116-128
robust design*A New Graduate Course: Using Simulation Models for Engineering Design	Barton, R.R.	March	145-153
rules-based expert systems*Evolving a Rule-Based Fuzzy Controller	Cooper, M.	July	67-73
run-length*An heuristic Technique for Selecting the Run-Length of non-Terminating/	Robinson, S.	Sept.	170-179
s-parameters*Electrical Characterization of High-Speed Interconnects with a Parallel /	Bataineh, A.	May	289-295
satellite control*Neural Network Control of a Free-Flying Space Robot	Wilson, E.	Aug.	103-115
scheduling heuristic*A Simulation Model of Drum-Buffer-Rope for Production Planning/	Guide,V.D.R.,Jr.	Sept.	157-168

self-referencing formulas*Dynamic Simulation Modeling on a Spreadsheet	Stent, A.F.	June	373-379
semantic analysis*Generating Simulation Models from Natural Language Specifications	Cyre, W.R.	Oct.	239-251
service specification Protocol Conversion in Multimedia Networks: Simulation/	Jeng, J-W	Jan.	51-60
Simulation and Computational Intelligence in Real-World Applications	Padgett, M.	July	5-9
Simulation and Verification of Protocol Using Deductive Machine	Lai, R.	Nov.	321-334
Simulation Comparison of Broadband Networking Technologies	Petr, D.W.	Jan.	42-50
Simulation in the Service of Society	McLeod, J.	Jan.	68-72
Simulation in the Service of Society	McLeod, J.	Feb.	135-140
Simulation in the Service of Society	McLeod, J.	March	203-208
Simulation in the Service of Society	McLeod, J.	April	279-284
Simulation in the Service of Society	McLeod, J.	May	343-348
Simulation in the Service of Society	McLeod, J.	June	410-415
Simulation in the Service of Society	McLeod, J.	July	83-88
Simulation in the Service of Society	McLeod, J.	Aug.	147-152
Simulation in the Service of Society	McLeod, J.	Sept.	215-220
Simulation in the Service of Society	McLeod, J.	Oct.	283-288
Simulation in the Service of Society	McLeod, J.	Nov.	346-352
Simulation in the Service of Society	McLeod, J.	Dec.	411-416
simulation methodologies*A Simulation Model for Defining Three Solar Accesses/	Obaidat, B.Q.	Dec.	357-371
Simulation of an Optical Architecture for High Speed Multistage Interconnection/	Guizani, M.	Jan.	27-33
Simulation of Future Natural Gas Production and Exploration	Connor, S.L.	April	213-225
Simulation Technique For Evaluating Cell-Loss Rate in ATM Networks	Ani, C.I.	May	320-330
Simulink*Power Simulation for All Electric Combat Vehicles	Fish, S.	Dec.	393-397
software systems*A Survey of TES Modeling Applications	Melamed, B.	June	353-370
solar access*A Simulation Model for Defining Three Solar Accesses/	Obaidat, B.Q.	Dec.	357-371
Spreadsheet Analysis of Linear Programs with Uncertainty	Leon, L.	Feb.	113-130
spreadsheet*Spreadsheet Analysis of Linear Programs with Uncertainty	Leon, L.	Feb.	113-130
spreadsheet*Dynamic Simulation Modeling on a Spreadsheet	Stent, A.F.	June	373-379
steady-state*An Heuristic Technique for Selecting the Run-Length of non-Terminating/	Robinson, S.	Sept.	170-179
stereographics*Virtual Mechanics Simulation and Animation of Rigid Body Systems/	Keller, H.	July	74-78
stochastic Petri Net*Performance Evaluation of a Blackboard Using Stochastic Petri Nets	Almhana, J.	Oct.	269-278
stochastic processes*A Survey of TES Modeling Applications	Melamed, B.	June	353-370
subjective information*Assessing Correlation Structures with Subjective Information/	Kumar, D.	May	333-340
sustainable energy development*The Geni Model: The Interconnection of Global/	Meisen, P.	April	244-252
synchronizing transition set*Protocol Conversion in Multimedia Networks/	Jeng, J-W	Jan.	51-60
synchronous optical network simulation*Methodology and Results of Synchronous Digital/	Owen, H.L.	Jan.	34-41
system dynamics*Maintaining Control of a Feebate System	Ford, A.	April	228-242
Taguchi paradigm*Using Simulation for Robust System Design	Benjamin, P.C.	Aug.	116-128
Taxonomy of Aircraft Ground Modal Behavior: A Brief Report	Kapadoukas, G.G.	Oct.	257-266
TCP*A Block-based Simulation Tool for the Enhancement of TCP/UDP Protocols	Chen, J.	Jan.	61-63
TDTD algorithm*Electrical Characterization of High-Speed Interconnects with a Parallel/	Bataineh, A.	May	289-25
TES processes*A Survey of TES Modeling Applications	Melamed, B.	June	353-370
The Geni Model: The Interconnection of Global Power Resources to Obtain/	Meisen, P.	April	244-252
The Virtual Design Team: A Computer Simulation Framework for Studying Organizational/	Jin, Y.	March	42-57
thruster*Neural Network Control of a Free-Flying Space Robot	Wilson, E.	Aug.	103-115
token bus*A Performance Simulation Study of the Ethernet and Token Bus Local/	Obaidat, M.S.	June	381-397
train blockage*A Simulation Modeling Methodology for Analyzing Large Complex/s	Dessouky, M.M.	Aug.	131-142
Transistor Level Link for VHDL Simulation of VLSI Circuits	Navabi, Z. A	March	185-197
UDP*A Block-based Simulation Tool for the Enhancement of TCP/UDP Protocols	Chen, J.	Jan.	61-63
Ultra High Voltage (UHV)The Geni Model: The Interconnection of Global Power/	Meisen, P.	April	244-252
uncertainty*Spreadsheet Analysis of Linear Programs with Uncertainty	Leon, L.	Feb.	113-130
Universal Database for Dynamic Simulation	Chen, F.F.K.	Nov.	293-303
universal database*Universal Database for Dynamic Simulation	Chen, F.F.K.	Nov.	293-303
Using Simulation for Robust System Design	Benjamin, P.C.	Aug.	116-128
Using Walsh Functions to Test a New Composite Sherif-Dear (CSD) Random Number/	Sherif, Y.S.,	Nov.	338-342
fuzzy logic*Information Fusion by Fuzzy Set Operation and Genetic Algorithms	Loskiewicz-Buczak, A.	July	52-66
validation*Taxonomy of Aircraft Ground Modal Behavior: A Brief Report	Kapadoukas, G.G.	Oct.	257-266
variance reduction*Generating Antithetic Random Variates in Simulation of a Replacement/	Mahlooji, H.	Aug.	94-100
VHDL*Generating Simulation Models from natural Language Specifications	Cyre, W.R.	Oct.	239-251
vibration monitoring*Information Fusion by Fuzzy Set Operation and Genetic Algorithms	Loskiewicz-Buczak, A.	July	52-66
Virtual Mechanics Simulation and Animation of Rigid Body Systems with AERO	Keller, H.	July	74-78
virtual reality*Simulation and Computational Intelligence in Real-World Applications	Padgett, M.	July	5-9
Walsh Functions*Using Walsh Functions to Test a New Composite Sherif-Dear (CSD)	Sherif, Y.S.,	Nov.	338-342
wavelets*Comparison of Neural Network Algorithms for Face Recognition	Micheli-Tzanakou, E.	July	15-27
wheeling*The Geni Model: The Interconnection of Global Power Resources to/	Meisen, P.	April	244-252
